WHERE KNOWLEDGE MEETS INNOVATION TO CREATE A SMARTER MAINTENANCE SOFTWARE
ManWinWin 7

ManWinWin 7 is an easy-to-use, highly advanced and mobile-friendly Maintenance Management Software (CMMS), with artificial intelligence and augmented reality features.

ManWinWin Software is the World’s most experienced company in CMMS, a rock-solid company for more than 40 years with a foundational drive for improving maintenance and investing in people.

Know-how and drive for improvement meets state-of-the-art tech. ManWinWin 7 is a valuable investment in digitalizing maintenance processes, which brings your company cost-savings, reduces your equipment downtime, and increases your team’s productivity.
If the software is easy-to-use, your technicians will use it. **Simplicity is critical.** ManWinWin 7 APP brings your technicians a smooth user experience, which will promote software adoption among your team.

With the new ManWinWin 7 APP, technicians will easily record all information in real time, which will bring your company important maintenance data for analysis and reporting to Top Management.

Information is recorded effortlessly from anywhere, anytime, directly on mobile devices, without the need for paper – this significantly increases efficiency and productivity.

Our users worldwide strongly approve ManWinWin’s overall usability. ManWinWin 7 APP was developed with maintenance people like you in mind.
ManWinWin WEB has a new look & feel

ManWinWin 7’s WEB Interface was completely redesigned with a UI/UX standard that makes it even easier to use on tablets or screens of any size.

The entire user experience was revamped. It is more logical, more intuitive. It allows for technicians to carry out tasks with the help of augmented reality features, with real images of your equipment and its components, and easily record time spent using a start/stop button. For your company, this means productivity.
ManWinWin 7 Desktop was enhanced with several new features that facilitate the day-to-day of maintenance managers and technicians, focused mainly on the most accessed features of the software.

A brand-new design of the Equipment and Work Orders windows, with information organized in a direct, more intuitive way for you.

Along with several performance improvements, a new Admin area was created to manage user profiles, general settings and custom fields.

**A seamless experience at your desk**
What if you use an intelligent maintenance system that transforms all your maintenance data into valuable information for you, using Artificial Intelligence algorithms?

Meet Winston: a meticulous, hardworking & friendly assistant who provides real-time Alerts, Insights and Forecasts that helps maintenance managers make the right decisions at the right time.

Winston processes all available information in real-time and notifies specific users whenever something relevant happens.

If something is not right, Winston will notify you immediately. Meet Winston, your smart maintenance assistant.
