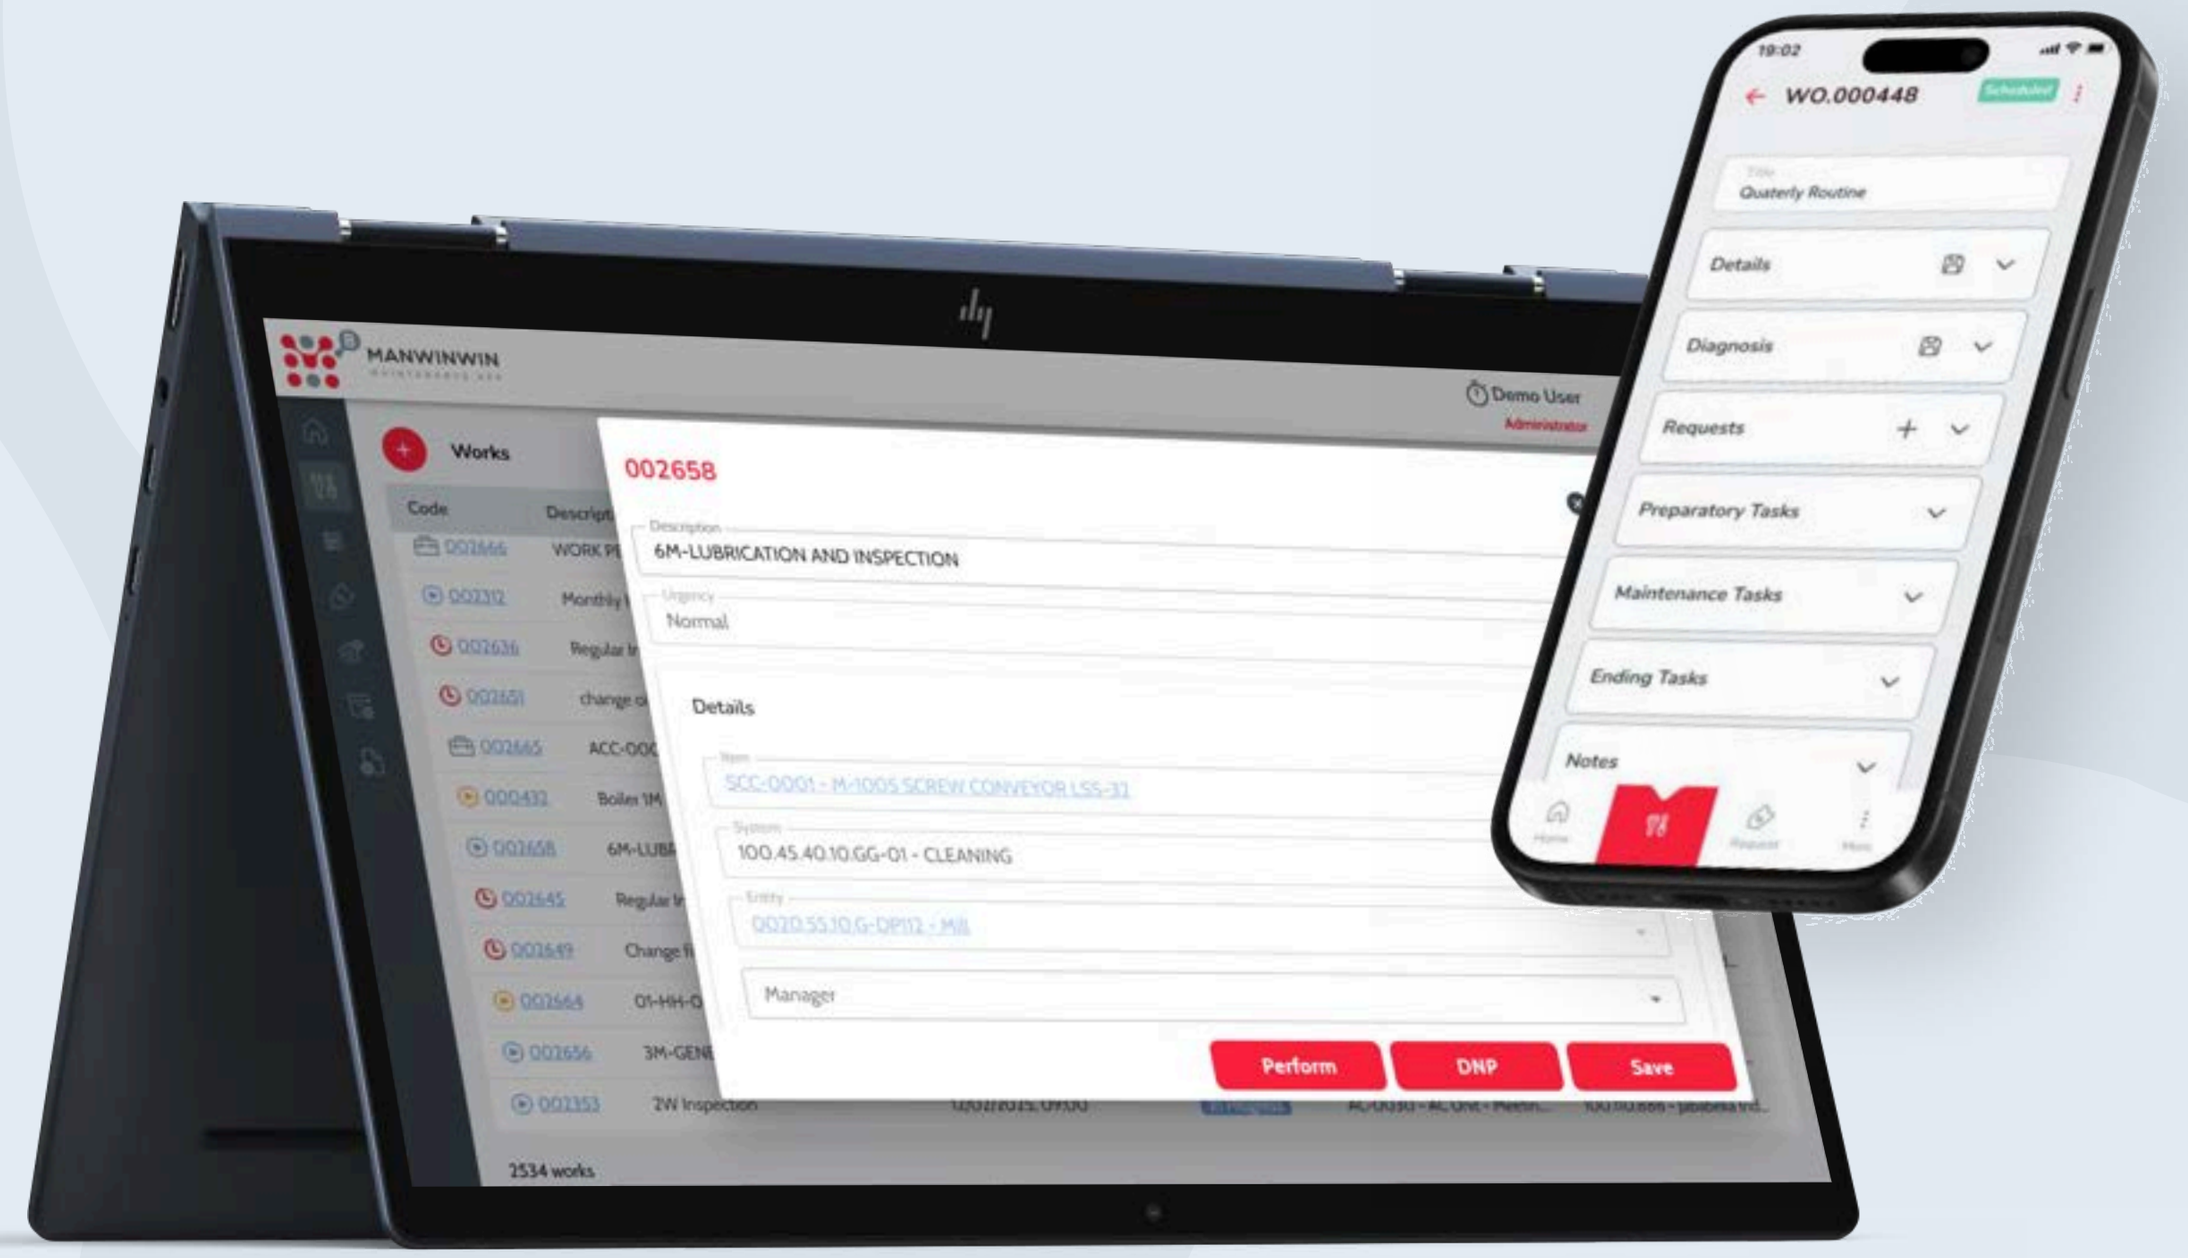
Maintenance Management Software

Industrial Plants • Equipment • Facilities • Buildings • Fleet



MANWINWIN

manwinwin.com

What makes ManWinWin the right choice

Smart Maintenance

Winston is ManWinWin's friendly and smart assistant that gives you real-time alerts, insights and AI-based forecasts.

Smart tag (QR Code & NFC)

Through a simple QR Code or NFC tag scan, ManWinWin Smart Tag allows you to perform maintenance tasks directly on equipment registered in ManWinWin.

Digital Signatures

Field technicians carry out maintenance work, supervisors approve this work, all of which is validated through digital signatures directly on your touch screen.

Mobile App

A simple and modern App to record maintenance requests, view and report maintenance work orders, register stock outs, record new equipment, running records and reading parameters.

What makes ManWinWin the right choice

Augmented Reality

With the help of Augmented Reality (AR), field technicians can directly access instructions, images and videos on how to easily carry out tasks on equipment and its components.

Start & Stop

Both in the Web interface and the mobile App, technicians can easily report time spent using a simple Start & Stop button, directly linked to the work order.

API Integration

ManWinWin has a structured and documented API that covers practically all features of ManWinWin, allowing the integration with any other softwares.

Customized KPI

Technical, economical and organizational indicators, all customizable, will help maintenance departments monitor their activity; all KPI follow existing legal & best practices frameworks.

Using ManWinWin

ManWinWin Smart Tag

Scan an equipment’s QR Code or NFC Tag and record maintenance tasks directly on that equipment

Winston (Smart Maintenance)

Winston is a hard-working, friendly and smart assistant that generates alerts, insights and AI-based forecasts that help maintenance managers make the right decisions.

Power BI Dashboards

Manwinwin's software now features a dynamic Power BI dashboard. Get instant, interactive insights into your maintenance data, enabling smarter decisions across your workflow.

Workflow

Set triggers and conditions to ensure critical updates are delivered instantly, streamlining communication and efficiency across your operations.

Using ManWinWin

Advanced reports

Generate insightful reports for any timeframe or dataset, and conveniently automate their delivery via the workflow feature.

Import / Export Tools

Easily import your data during implementation or anytime needed. Plus, effortlessly export all information to Excel for flexible analysis and manipulation.

SLA (Service Level Agreement)

Manage your maintenance requests efficiently with SLA Management. Set and track service level agreements to ensure timely responses and optimal service delivery.

Augmented Reality with 2D

Guide your technicians visually with Augmented Reality (2D). Overlay essential task instructions directly onto real equipment images, ensuring accurate and efficient maintenance execution.

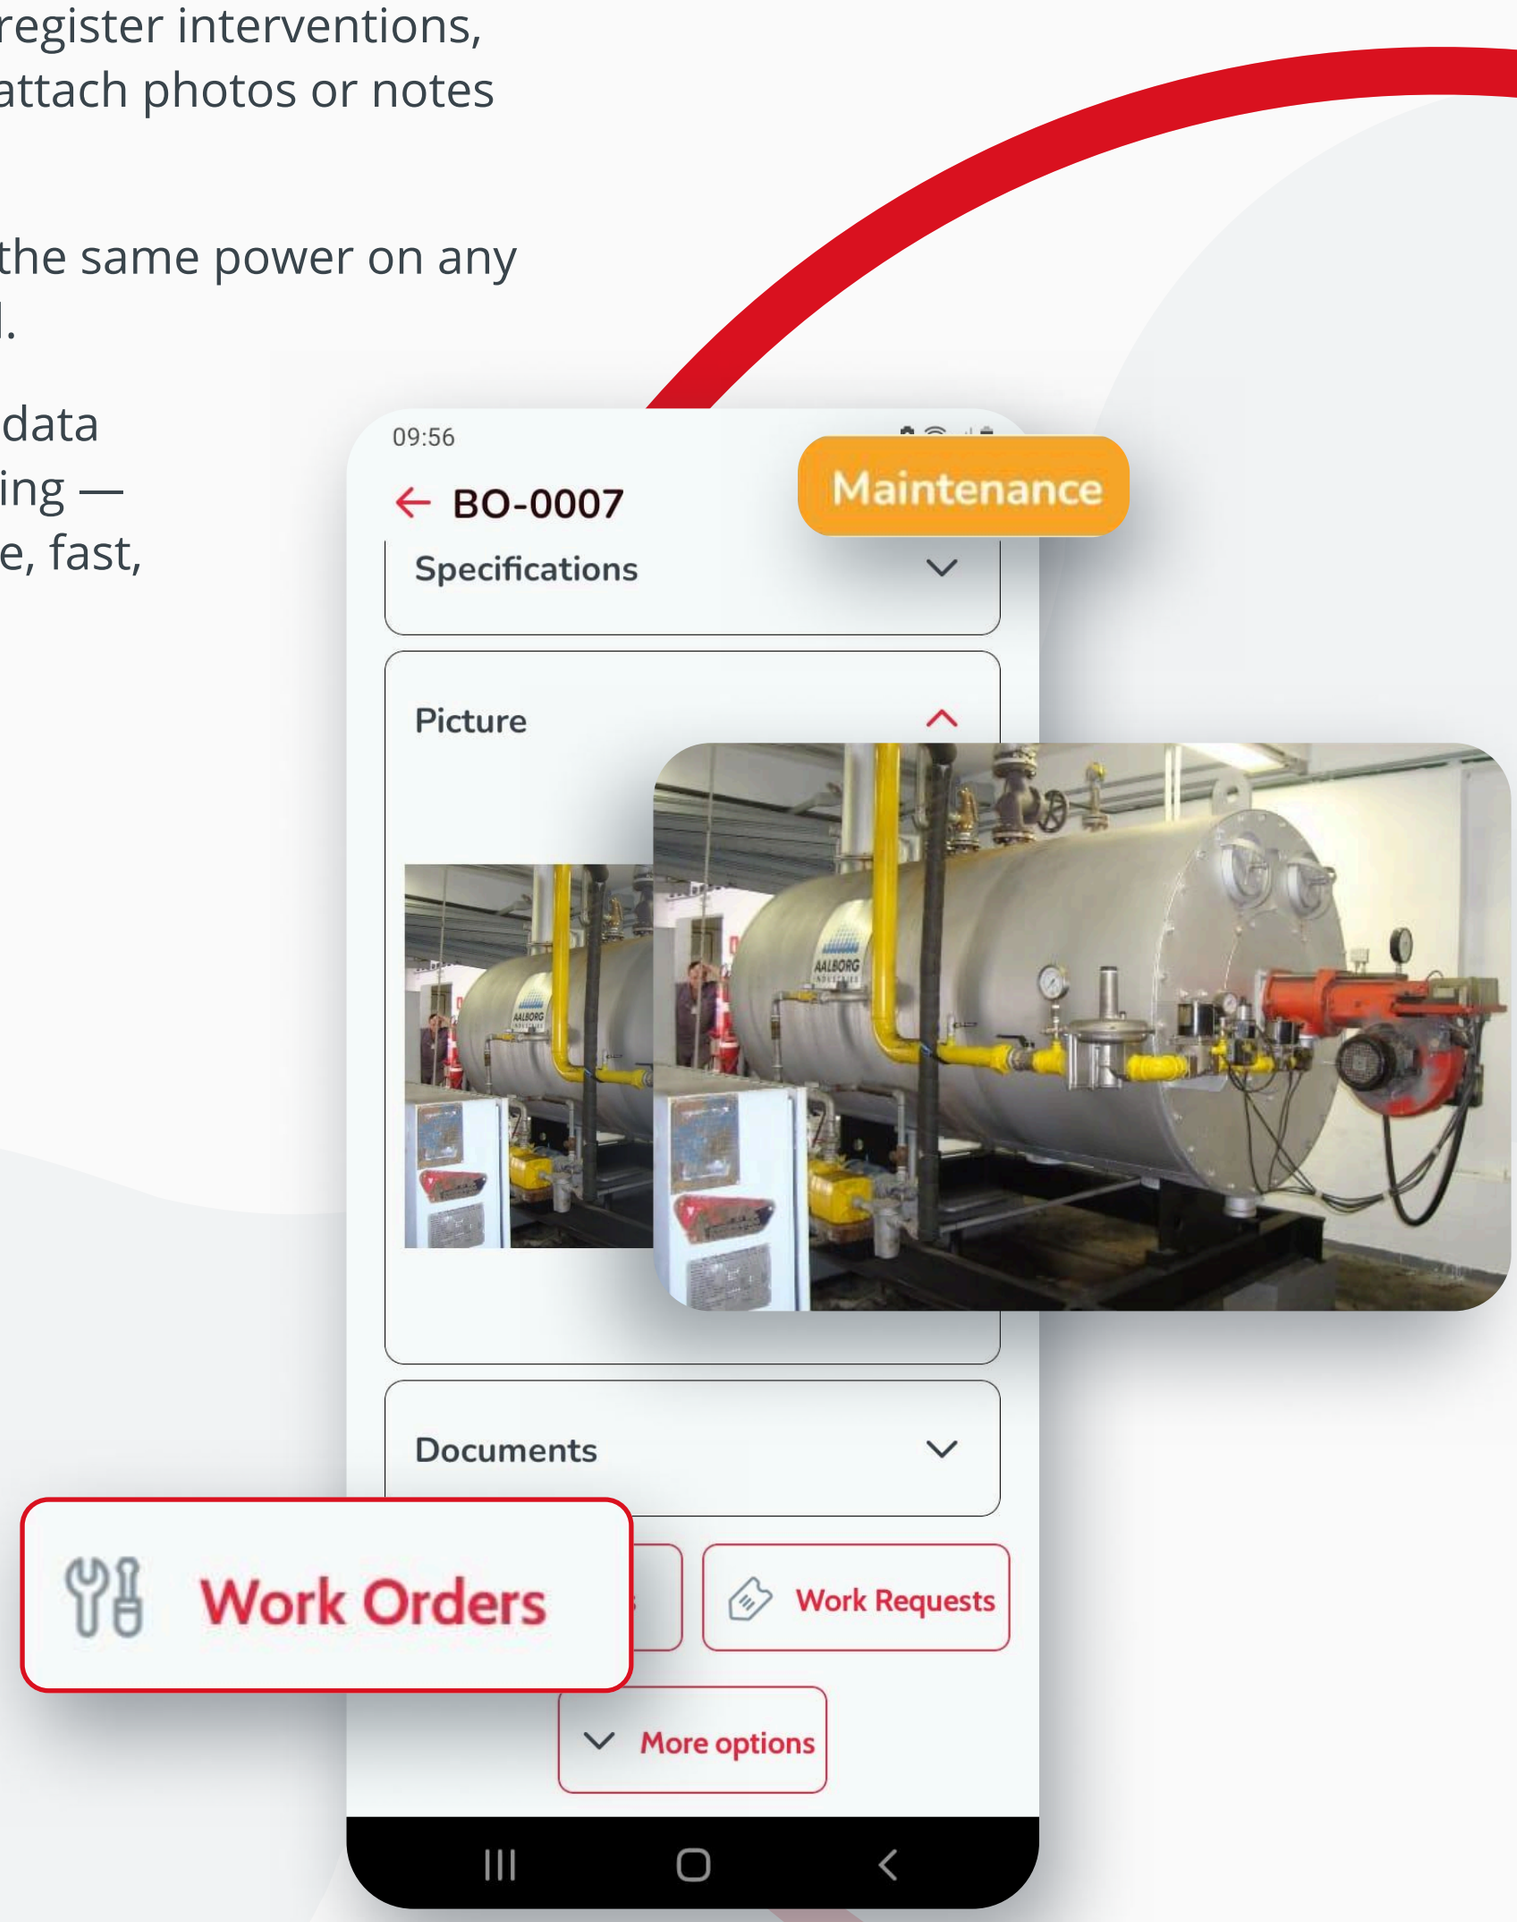
Mobile access made simple

With ManWinWin Mobility, managing maintenance has never been easier — anytime, anywhere, from any device.

Access all your work orders, assets, and maintenance history directly from your smartphone or tablet, whether you're using Android or iOS. Perform inspections, register interventions, start and stop tasks in real time, and attach photos or notes on the spot.

The Mobility Web interface gives you the same power on any browser, with no installation required.

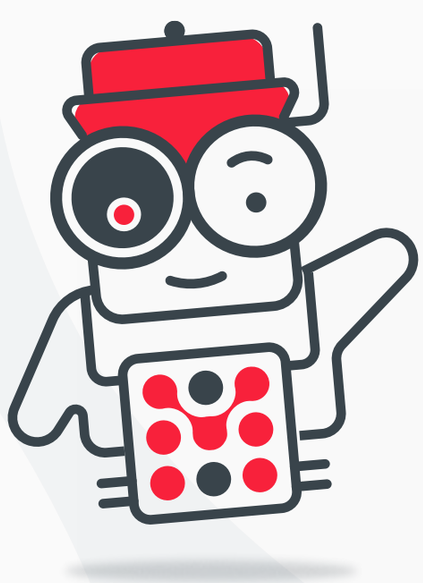
Stay connected to your team, update data instantly, and keep maintenance flowing — all from the palm of your hand. Simple, fast, and built for the way you work.



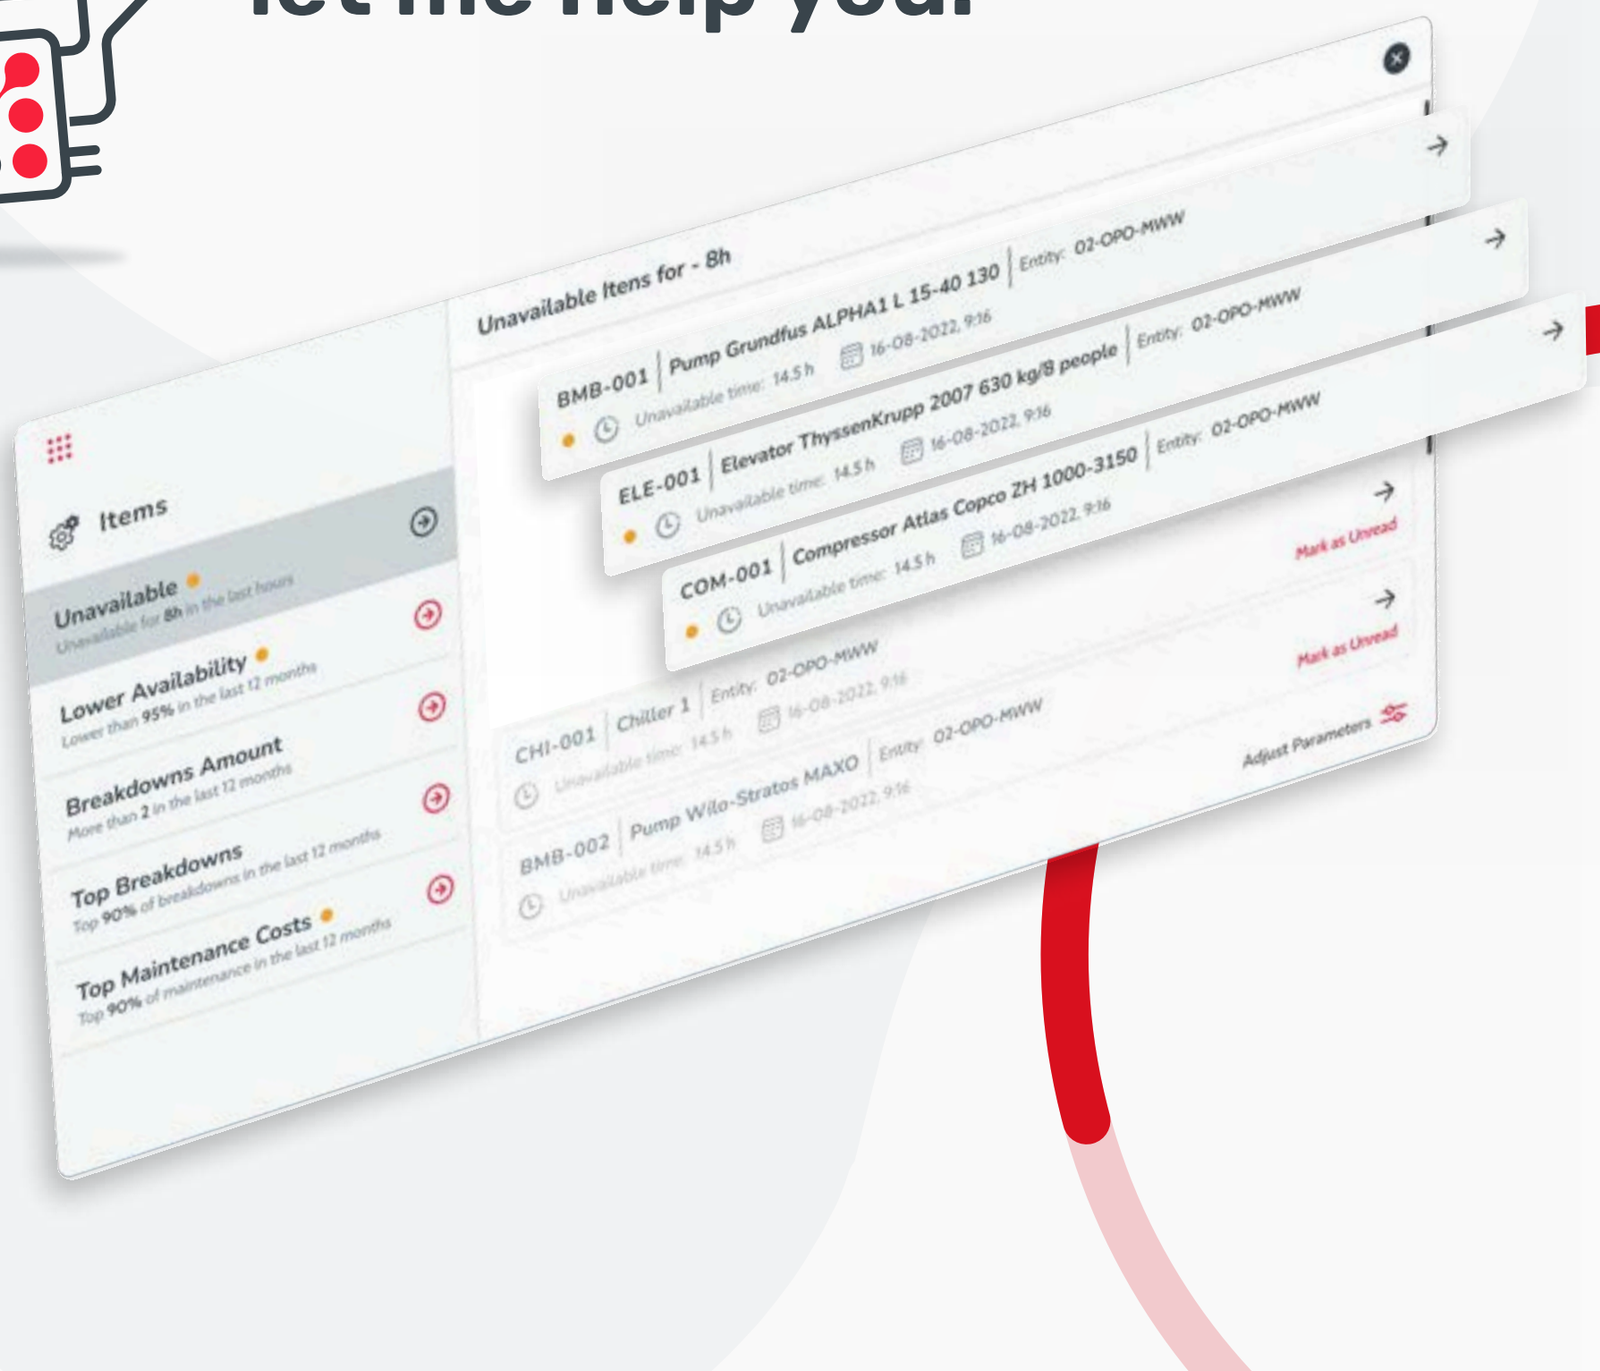
Smart maintenance management

What if you use an intelligent maintenance system that transforms all your maintenance data into valuable information for you, using **Artificial Intelligence** algorithms?

Meet Winston, your smart maintenance assistant. Using Artificial Intelligence, Winston turns your maintenance data into **real-time alerts**, **insights**, and **forecasts** — helping you prevent breakdowns, delays, and stockouts.
It analyzes information continuously and notifies the right users when action is needed.



Hi!
I'm Winston,
let me help you.



What clients say about us

ManWinWin Software actively challenged our way of thinking and guided us to focus on what was most important, ie on what we really needed.

Christian Schilling
Project Manager, INIT Dubai FZE

You have one of the best Customer Service I have ever dealt with, frankly, and you really are experts in maintenance management.

Michael Nasr
Digital Transformation and Excellence Manager, Danone Dairy – Egypt

We now control important KPIs and discuss them with our Management every Friday. Also, Production and Maintenance departments are in sync.

João Borrego
Methods and Continuous Improvement, Essilor Portugal

Get inspired by 5000+ ManWinWin Clients around the world
